

Restore the beauty of youthful skin

ANTI-AGEING EXTREME NIGHT CRÈME 60ml (19961)

86% OF WOMEN SAW AN IMPROVEMENT IN SKIN ELASTICITY*.

Restore Anti-Ageing Extreme Night Crème is a deeply nourishing night crème that helps minimise visible signs of ageing and reverse skin damage caused by UV stressors. Using the power of Grape Stem Cell Technology it helps to restore and repair skin firmness and minimise wrinkles for a noticeably younger, glowing complexion. With Night Jasmine Extract, the potent formula supports skin regeneration during the body's rest phase for increased hydration, smoother skin and visible anti-ageing results.

KEY INGREDIENTS AND BENEFITS

- **Grape Stem Cell Technology:** Protects skin stem cells against UV stresses, the leading factor in skin ageing. Grape Stem Cells help epidermal skin stem cells to maintain their key characteristics and fight against photo-ageing to maximise skin renewal and regenerative processes.
- **Plantago Leaf Extract:** Repairs loss of firmness and elasticity, increasing density and smoothing skin so it regains its original appearance. Visibly reduces the appearance of pigmentation and discolouration.
- **Vitamin B3:** Helps reduce the appearance of wrinkles and improves skin tone for more even-looking skin. Increases skin hydration, keeping skin smooth and comfortable.
- **Tetrapeptide-7:** Works to reduce wrinkle depth and improves skin firmness for younger looking skin.
- **Night Jasmine Extract:** Helps cell regeneration and the restoration of the skin's barrier function during sleep.
- **Moringa Oil:** Keeps skin moisturised longer for smoother, healthier skin.

WHO IS IT FOR?

Women experiencing the visible signs of ageing: wrinkles, pigmentation and stress.

HOW DO I USE IT?

Apply at night, after cleansing and toning. Avoid eye area.

WHAT DO I USE IT WITH?

Restore Anti-Ageing Extreme Serum (19960)

Restore Toning Lotion (19966)

Restore Anti-Ageing Eye Crème (11970)

Global skincare brands are talking about "Stem Cells" and "Skin Cells" as a new language of innovation. According to beauty magazines, trend articles and industry news Stem Cell Technology is one of the key mega trends to show the most promising results in anti-ageing. Inspired by Nobel Prize winning research, the potential of stem cell technology is immense. It holds the promise that one day it will change the world, but today, it will change your skin. Stem cell infused skincare is the next generation of high performance age defying products. We have developed the latest Restore Anti-Ageing Extreme Night Crème and Serum by harnessing the power of Grape Stem Cells. The result is two extremely potent anti-ageing formulas that combat visible signs of ageing and UV damage. Epidermis cells are targeted to improve longevity and strength so skin appears firmer, less wrinkled, refined and more luminous than ever before.

ANTI-AGEING EXTREME NIGHT CRÈME Q & A

Q: What are Plant Stem Cells?

A: Plant Stem Cells are cells that produce new cells throughout their lifetime, hold extreme regenerative and renewal power and never undergo ageing. They are reported to bring exceptional anti-ageing benefits to skincare. Research shows that Plant Stem Cells can help assist skin stem cells maintain their key characteristics.

Q: What are skin stem cells?

A: Our body has two types of cells – stem cells and regular cells. In the skin, the stem cells are the cells that reproduce new cells at the basal layer. When we are healthy and young, our stem cells are strong and produce healthy, regular sized cells which is why our skin looks smooth and plump. With time, our skin is constantly being exposed to stressors – the most fundamental one being UV radiation. They penetrate the skin and start to compromise the stem cells vitality. When the activity of skin stem cells decreases, regeneration slows down, skin loses firmness, wrinkles appear.

Q: How does Grape Stem Cell Technology work?

A: With Plant Stem Cells, skin can fight back against ageing and damage caused by UV radiation (which is responsible for 80% of skin ageing). Nutrimetics Beauty Lab has reinvented Restore Serum and Night Crème with 'Grape Stem Cell Technology' harnessing the extreme power of nature's most UV resilient red grape from Burgundy, France. It also possesses exceptionally high antioxidant content and helps to improve skin cells vitality by +60% (in vitro studies of Grape Stem Cells). Grape Stem Cells create a protective barrier against UV stressors, so that your own stem cells are preserved and their vitality is not compromised. It helps your skin regenerate, restores firmness and reverses visible effects of photo-ageing.

Q: How is Restore Extreme different to the original Restore formula?

A: Restore Anti-Ageing Night Crème and Serum have been re-formulated with advanced technology and improved potency for enhanced visible results. New Restore Extreme delivers even stronger anti-ageing results due to the UV damage recovery power of Grape Stem Cell Technology. 9 out of 10 women agreed that new formula of Restore Extreme Serum and Night Crème performs better than original (based on consumer self-evaluation after 4 weeks of application). The Restore Serum has been upgraded with an airless pump to ensure the active ingredients maintain potency and for more precise application.

Q: Why it is important to use a Night Crème?

A: The skin's functions and needs are different during day and night. During the day, skin needs a crème with lighter texture that moisturises and protects from damaging UV rays and skin stressors. At night, skin switches into repair mode and requires a nourishing creme that will stimulate skin renewal and protect from stressors. Using the power of Grape Stem Cells, Restore Anti-Ageing Extreme Night Crème protects skin against damage from stressors to improve the longevity of skin stem cells and stimulate skin renewal.

Q: Why do I need to use Serum and Night Crème together?

A: Restore Anti-Ageing Extreme Serum has higher concentration of active ingredients that instantly penetrates skin and significantly enhances the effect of Restore Anti-Ageing Extreme Night Crème. To maximise skin recovery, use the Serum and Night Crème together as they work in synergy to delivery powerful overnight recovery for maximum anti-ageing results. Apply Restore Anti-Ageing Extreme Serum in the morning following your day crème for enhanced results as part of your Restore skincare programme.

Q: How quickly can I expect to see results?

A: Many users report immediate improvements in overall skin appearance but expect to see a noticeable difference within as little as 14 days. For best results, we recommend daily application as part of your Restore skincare programme.

Q: Do I need sunscreen?

A: While Restore Anti-Ageing Extreme Serum and Night Crème are ideal for combating the visible effects of sun-induced ageing overnight, you still need SPF protection during day. To guard against UVA/UVB rays, we recommend applying Restore Anti-Ageing Day Crème SPF15 or Ultra Care+ SPF50+ Day Lotion after your Restore Anti-Ageing Extreme Serum every morning to protect the benefits of your anti-ageing regime.
